

BRUNO SMITH SAGAYAM

IT Operations & Technical Support Professional | AI/ML Graduate Certificate | Remote-Ready

226-289-9343 | brunosmith2799@gmail.com | London, ON, Canada | brunosmith.me | linkedin.com/in/brunosmith27 | github.com/brunosmith27

PROFESSIONAL SUMMARY

IT Operations and technical support professional with 10+ years of experience across enterprise banking and MSP environments, including multi-province support for government, healthcare, and nonprofit organizations. Proven track record working fully remote, with hands-on experience across ticketing platforms (Autotask, ConnectWise), multi-vendor network/firewall environments, and Microsoft 365/Azure AD administration. Completed an Ontario Graduate Certificate in AI with Machine Learning at Humber Polytechnic, adding practical exposure to cloud ML tooling, Python, and applied AI development on top of a strong operations foundation. Canadian Permanent Resident — eligible to work in Canada with no sponsorship required; also eligible to work in India. Seeking remote, Ontario-based, or India-based IT operations and technical support roles, with an interest in growing into AI-enabled IT operations over time.

TECHNICAL SKILLS

IT Operations & Support: Service desk operations, Tier-1 triage & escalation, first-call resolution, client onboarding/offboarding, endpoint provisioning, ticketing (Autotask, ConnectWise Manage), documentation (IT Glue, Confluence-based review workflows)

Cloud & Identity: Microsoft 365 / Azure Active Directory (operational administration & troubleshooting), Google Workspace (familiar), AWS (SageMaker, EC2, S3 — via applied coursework)

Networking & Security: Multi-vendor firewall/VPN troubleshooting (Cloudflare, SonicWall, OPNsense), VLAN, DNS, SSL/TLS, network switch diagnostics, VoIP/desk phone systems

AI / ML (Graduate Coursework): Python (foundational), TensorFlow/Keras, Scikit-learn, XGBoost (course-level, AI-assisted development), LangChain & RAG concepts (beginner), ROS2 & Gazebo simulation (capstone)

Automation & Scripting: PowerShell (operational-level troubleshooting), Bash (basic)

Tools: Git / GitHub, VS Code, Jupyter Notebook, Windows 10/11, macOS

ML PROJECTS — FULL CODE AT [GITHUB.COM/BRUNOSMITH27](https://github.com/brunosmith27)

Capstone — DeepQuad: Sensor Fusion for Distance-Aware Navigation (*Humber AI/ML Graduate Certificate, sponsored by Kavares Inc.*)

ROS2 Humble · Gazebo Classic 11 · Python · Simulation (no physical hardware)

- 4-person team project building an obstacle-avoidance system for a simulated Ackermann-steered ground vehicle over a 10-week scoped capstone
- Designed and iterated an early rule-based obstacle-avoidance node (single depth camera, zone-based distance logic) using AI-assisted development
- Debugged the ROS2/Gazebo simulation environment, including launch-order dependencies and node/topic architecture; identified an unresolved conflict between multiple avoidance nodes publishing to the same steering topic
- Built the manual teleop control node; ran a live data-collection session used for the team's model training
- Reviewed and tested a teammate's pull requests via GitHub; authored the team's final technical report, including an honest documentation of the model's evaluation limitations

Applied ML Coursework — Bank Deposit Prediction, Security Risk Classification, News Article Classification

Python · AWS SageMaker · XGBoost · TensorFlow/Keras · Scikit-learn

- Built end-to-end ML pipelines through Humber's AWS Learning Lab coursework, using AI-assisted development while working through model selection, hyperparameter tuning, and evaluation concepts hands-on
- Applied XGBoost, deep neural networks, and TF-IDF/NLP techniques across three separate course projects covering classification and prediction tasks

PROFESSIONAL EXPERIENCE

IT Support Technician | Infinity Network Solutions (MSP) | Remote — worked from Ireland, ON; 2022 – Aug 2025
company headquartered in Owen Sound, ON

- Served as first point of contact for a multi-province MSP supporting government, healthcare, and nonprofit organizations — including fire departments, women's health centers, and arts organizations — delivering first-call resolution through phone-based troubleshooting
- Grew into client onboarding/offboarding: provisioning new-hire machines, configuring conferencing and collaboration tools, and handling server-side setup

- Resolved Active Directory/Microsoft 365 sync issues during on-premises-to-cloud migrations by researching Microsoft's documentation and internal runbooks, working around gaps in incomplete MSP documentation
- Troubleshoot multi-vendor firewall and VPN environments across client sites (Cloudflare, SonicWall, OPNsense), adapting to each client's distinct network configuration
- Diagnosed network outages through switch-level checks (power, IP, connectivity) and resolved VoIP/desk phone system issues
- Authored and maintained client documentation in IT Glue with full editing autonomy
- Following a company-wide downsizing, retained to personally manage onboarding, offboarding, and ongoing support for the company's ~25 VIP client accounts
- Adapted to a full ticketing-platform migration from Autotask to ConnectWise Manage
- Delivered all of the above fully remotely — a proven track record of independent, effective remote support work

IT Operations Analyst — Service Desk | TD Bank Group | Toronto, ON

2018 – 2022

- Provided Tier-1 technical support for TD employees enterprise-wide, handling a high daily call volume (40–80 calls/day) within a strict average handling time, triaging issues across numerous third-party integrated applications and escalating to Tier 2 support
- Volunteered for extended shifts during the company's Windows 7 to Windows 10 migration, assisting employees with A/V configuration and Citrix/remote desktop environment setup
- Proposed documentation and SOP updates through a structured review and approval process in a large, regulated enterprise environment
- Built a foundation in enterprise-scale incident triage, structured escalation workflows, and working within strict SLA-driven call-handling targets

IT Support — Salesforce Technical Team | STS InfoTech (Contractor: Cisco Systems) | Bangalore, India

2014 – 2015

- Completed a 3-month specialized training program delivered by Cisco/Salesforce trainers based in the US and Singapore
- Provided application and telephony (softphone/hardphone) troubleshooting support for Cisco's global Salesforce account manager team

EDUCATION

Ontario Graduate Certificate — Artificial Intelligence with Machine Learning

Humber Polytechnic, Toronto, ON | September 2026 — Completed

Post-Graduate Diploma — Software Testing

Fanshawe College, London, ON | 2016 – 2017

Bachelor of Computer Science

St. Joseph's University, Bangalore, India | 2010 – 2013

CERTIFICATIONS

Microsoft Certified: Azure AI Fundamentals (AI-900) — 2025

Google Cybersecurity Foundations — Coursera

ADDITIONAL INFORMATION

Canadian Permanent Resident — eligible to work in Canada, no sponsorship required; also eligible to work in India
 Open to remote roles worldwide (proven track record), and hybrid/onsite roles in Ontario, Canada or Bangalore, India
